

{ Please add the following new claims: }

Sub. F3
103. A composition comprising infectious alphavirus particles in an amount effective to provide a protective immune response, wherein said alphavirus particles comprise one or more heterologous nucleotide sequences encoding a native cancer cell antigen; and wherein said native cancer cell antigen is a *Her2/neu* gene product, and further wherein said alphavirus particles comprise one or more attenuating mutations.

E3
104. A composition comprising infectious Venezuelan Equine Encephalitis (VEE) particles in an amount effective to provide a protective immune response, wherein said VEE particles comprise one or more heterologous nucleotide sequences encoding a native cancer cell antigen; and wherein said native cancer cell antigen is a *Her2/neu* gene product, and further wherein said VEE particles comprise one or more attenuating mutations.
